User’s Operating Instructions & Important Warranty Information

Please keep these instructions in a safe place. If you move house, please hand them over to the next occupier.

Baxi Combi 133 HE Plus
Baxi Combi 100 HE Plus
Baxi Combi 80 HE Plus

Gas Fired Wall Mounted Condensing Combination Boiler
Baxi is one of the leading manufacturers of domestic heating products in the UK.

Our first priority is to give a high quality service to our customers. Quality is designed into every Baxi product - products which fulfil the demands and needs of customers, offering choice, efficiency and reliability.

To keep ahead of changing trends, we have made a commitment to develop new ideas using the latest technology - with the aim of continuing to make the products that customers want to buy.

Everyone who works at Baxi has a commitment to quality because we know that satisfied customers mean continued success.

We hope you get a satisfactory service from Baxi. If not, please let us know.

---

This product has an energy rating (A) on a scale of A to G. For more information see www.boilers.org.uk. This is a certification mark.
If the Red Flame Failure Light (Red Light) is ON press the Reset Button. If Flame Failure occurs frequently consult your Installer.

This indicates that the Burner has fired up and heating your water.

Central Heating Temperature Control

Turn the Central Heating Temperature Control Knob clockwise to increase or anticlockwise to decrease the boiler flow temperature.

Reset Button

If the Red Flame Failure Light (Red Light) is ON or flashing, press the Reset button until the red light goes OFF. If this occurs frequently a fault is indicated, you should contact your installer.

Domestic Hot Water Temperature Control

Turn the Domestic Hot Water Temperature Control Knob clockwise to increase or anticlockwise to decrease the temperature. Range 45 - 55°C.
Boiler not working

START

Make sure the gas supply is turned ON and check if other gas appliances are operating (e.g. fire, cooker).

NO

If no gas, consult your supplier.

YES

Is there electricity to the boiler? (Green Mains ON Light lit).

NO

Check electrical supply to boiler is switched on.

YES

Is the Green Burner ON Light illuminated?

NO

Boiler operating satisfactorily.

YES

Is the Central Heating System Pressure between 1 and 2.5 bar?

If the reading falls below 1 bar repressurise the system as described in section 3.0.

YES

Is the Red Flame Failure Light illuminated or flashing?

NO

CONTACT YOUR INSTALLER OR SERVICE ENGINEER.

YES

Press the Reset Button until the red light goes off.

If the light does not go out or keeps coming on

Pressure Gauge

Boiler indicators showing low pressure

Burner ON Light (Green)

Flame Failure (Red)

Reset Button

Boiler operating satisfactorily.
2.0 Troubleshooting

Is the Timer ON and calling for heat?

YES

Is the Room Thermostat (if fitted) set high enough?

YES

NO

Turn Room Thermostat to maximum setting (typical example shown)

NO

Ensure timer is set for Central Heating ON (see any instructions supplied with timer)

If you don’t know what you need to do to get the boiler to light, or need help with the system and controls, contact your installer as soon as possible.
3.0 Repressurising System

3.1 Central Heating System Pressure

1. The normal operating water pressure is in the green area between 1 and 2.5 bar (Fig. 1). If the pressure exceeds 3 bar the safety pressure valve will operate and a fault is indicated. Contact your installer.

2. It may be necessary to repressurise the system occasionally (Fig. 2). A filling device (the ‘filling loop’) will be fitted on the system. This may be on the boiler itself, or on pipework near to the boiler.

3. If you are unsure of its position, or cannot identify it, consult the installer who fitted the boiler.

4. The filling loop consists of two taps and a separate metal braided hose pipe (Fig. 3).

5. Only when repressurising should the hose be connected between the two taps. No tools are necessary for this, but ensure that the wing nuts on the hose pipe ends are tightened onto the taps.

6. Fully open one of the taps first, and then while watching the pressure gauge, carefully open the second tap.

7. When the needle on the gauge is into the green zone and indicating 1 (Fig. 1) or more turn both taps off.

8. Disconnect the hose from the taps (a small amount of water may be present) and remove it. Keep the hose in a safe place for future use.
4.0 Clearances

4.1 For your Safety

1. This appliance must have been installed in accordance with the manufacturer’s instructions and the regulations in force.

2. Any modification that may interfere with the normal operation of the appliance without express written permission from the manufacturer or his agent could invalidate the appliance warranty. In GB this could also infringe the Gas Safety (Installation and Use) Regulations.

3. Your boiler must not be operated without the casing correctly fitted.

4. Do not interfere with any sealed components on this boiler.

5. Take note of any warning labels on your boiler.

6. Your boiler should have the following minimum clearances for Safety and Maintenance (Figs. 4 & 5):

   - Top: 200mm
   - Bottom: 200mm
   - Left side: 5mm
   - Right side: 5mm
   - Front: 5mm (In Operation), 500mm (For Servicing)

7. If your boiler is installed in a compartment, do not use it for storage purposes. Do not obstruct any purpose provided ventilation openings.

8. Flammable materials must not be stored in close proximity to your boiler.

9. Avoid skin contact when your boiler is in operation, as some surfaces may get hot e.g. pipework.

10. Ensure that the flue terminal outside the house does not become damaged or obstructed, particularly by trees or bushes.

11. It is important that the condensate drain system is not blocked, modified or damaged in any way as this would affect the operation of your boiler. Your installer should have insulated any exposed pipework.
5.0 Care of the Boiler

5.1 Cleaning the Outercase

1. The painted panels should be wiped with a damp cloth and then dried completely. **DO NOT USE ABRASIVE CLEANING AGENTS.**

5.2 Protection & Precautions

1. The boiler incorporates an integral frost protection feature that will operate in both modes. If the boiler temperature falls below 4 °C, the boiler will fire until a temperature of 15 °C is reached.

2. If a system frost thermostat has been fitted (your Installer will be able to advise you), then to operate correctly and protect your system, the gas and electricity must be left on and the appliance set in the central heating mode.

3. The boiler incorporates an integral pump protection feature which continually monitors the time since the pump last operated. To prevent seizure, the pump will operate for approximately 1 minute if it has not run in the last 24 hours.
6.0 Legislation

6.1 Installation, Commissioning, Service & Repair

1. This appliance must be installed in accordance with the manufacturer’s instructions and the regulations in force. Read the instructions fully before installing or using the appliance.

2. In GB, this must be carried out by a competent person as stated in the Gas Safety (Installation & Use) Regulations.

3. Definition of competence: A person who works for a CORGI registered company and holding current certificates in the relevant ACS modules, is deemed competent.

4. In IE (Eire), this must be carried out by a competent person as stated in I.S. 813 “Domestic Gas Installations”.

All CORGI registered installers carry a CORGI identification card (see Fig. 6) and have a registration number. You can check your installer is registered by telephoning 0870 4012300 or writing to:-

1 Elmwood, 
Chineham Business Park, 
Crockford Lane, 
Basingstoke. RG24 8WG

or check online at www.corgi-gas-safety.com

The boiler meets the requirements of Statutory Instrument “The Boiler (Efficiency) Regulations 1993 No 3083” and is deemed to meet the requirements of Directive 92/42/EEC on the energy efficiency requirements for new hot water boilers fired with liquid or gaseous fuels:

Type test for purpose of Regulation 5 certified by: Notified Body 0086.

Product/Production certified by: Notified Body 0086. Ref: 86-BL-647

For GB/IE only.

6.2 Benchmark Commissioning Check List

1. Please ensure that your installer hands you the boiler Installation & Service Instructions with the “Benchmark” Commissioning Checklist sections completed. The details in the Checklist will be required in the event of any warranty work. Keep the instructions in a safe place and ensure that the Service Interval Record at the back is completed at each service visit.
7.0 Emergency

If you smell gas

Turn off the gas supply at the meter and call your gas supplier immediately. It is possible to isolate the boiler and at the isolating valve (Fig. 7).

Transco operate a 24 hour emergency service and the telephone number will be listed in your telephone directory.

Faulty boiler

If it is known or suspected that a fault exists on the boiler, it must not be used until the fault has been corrected by a competent person.

In an Emergency

If a water or gas leak occurs or is suspected, the boiler can be isolated at the taps under the boiler as follows;

1. Turn off the electrical supply to the boiler.
2. Using a suitable flat bladed screwdriver turn the tap on the gas cock 90° clockwise to isolate the gas supply at the boiler (Fig. 7).
3. The heating system and mains water isolating valves are positioned under the boiler and can be closed by turning their taps 90° clockwise (Fig. 7).
4. Call your Installer or Service Engineer as soon as possible.
8.0 Warranty & Service

Standard Warranty Terms & Conditions

12 Months Free Warranty - register today
To receive your 12 months free warranty please complete the form supplied with the boiler or simply call heateam, the service division of Baxi Heating UK Limited on 08706 000 653.

Our promise to you
If you experience a fault with your new boiler, we aim to provide a safe and high quality repair service supported by our dedicated national network of highly skilled engineers. If your installer can't resolve the problem for you, we will do everything we can to get an engineer out to you as quickly as possible. Nothing in this warranty will affect your statutory consumer rights.

What you need to do if you experience a problem with your heating system or the operation of the boiler
You should always contact your installer first, because the fault may not be related to the boiler. If your installer confirms that the fault is within the boiler itself and he/she can't repair it, our friendly customer service team is on hand to help. Simply call our service division heateam on 08706 096 096 to book an engineer visit or for any general advice that you may need. Our contact centre is open Monday to Friday 8am - 6pm, weekends and Bank Holidays 8.30am - 2pm, excluding Christmas Day and New Years Day.

When calling heateam it would be helpful if you could have the following information to hand:

1. boiler serial number (see opposite).
2. boiler make and model number.
3. Your installer name and address details.
4. Proof of purchase (if you do not have the boiler serial number).

What this warranty covers
Free of charge repair or replacement of components found to be faulty from manufacture.

Free of charge replacement of the complete unit provided always that the failure is related to a manufacturing fault that cannot be repaired or is uneconomic to repair.

The warranty runs for 12 months from the date your product is installed.

What this warranty does not cover
Repairs to boilers which haven't been installed and commissioned properly, and as set out in the installation instructions (this includes the need to flush the system effectively and add a suitable corrosion inhibitor).

Any damage caused by hard water scale deposits and/or aggressive water resulting from corrosion.

Any other defects or failures, either in the connected heating system or outside of the boiler itself.

Faults caused by an inadequate supply of electricity, gas or water to the property.

Installations within commercial settings for which this boiler was not designed.

Reimbursement of any third party repair or replacement costs that we haven't been told about or agreed with you in advance.

Compensation for consequential losses (e.g. loss of earnings, business losses, stress and inconvenience) arising from a product breakdown, including repair delays caused by factors outside our reasonable control.

Annual Service
To ensure you receive the maximum efficiency from your boiler we recommend your boiler has an annual service so you and your family can continue to enjoy heating and hot water comfort. To arrange an annual service from one of our Baxi Heating UK Limited heating experts, please call to arrange a visit convenient to you.
