BAXI

We'll help you get your bearings

As more and more homeowners look for lower energy heating, now's the time to get comfortable with Baxi Air Source Heat Pumps.

Whether you're new to heat pumps or already have a recognised heat pump qualification, we'll guide you through everything you need to know to become a Baxi Heat Pump Installer.

baxi.co.uk/training

From the bear facts to design, install and commissioning

From understanding how air source heat pumps work to designing, installing and commissioning them, there's a course for wherever you are on your journey.

We are always searching for new and better ways to support heating engineers. Every course in this guide is designed to help you improve your skills, so that you can work confidently and efficiently with air source heat pumps. The greater your knowledge the more you can offer to your customers.

Delivered by experts

Our accredited trainers are from installation and engineering backgrounds, they have experience of the challenges you face day-in, day-out.

Practical, hands-on training

Course content reflects the job you do and provides plenty of time with our products.

Local training centres across the UK

Wherever you are, you don't have to travel far to improve your skills.

CIPHE

Our flagship training centres in Dartford, Warwick and Warrington have been awarded CIPHE Approved Training Centres (ATC) status.

What training is right for me?

Course	What you'll learn	Who's it for?	How long?	Cost
ASHP Product Day	This course covers the principles of how a heat pump works, our ASHP product range and installation considerations. You'll get hands-on experience in real-world situations and ensure you stay compliant with the latest updates on the BUS scheme and MCS.	Installers who want to know more about the Baxi Air Source Heat Pump range.	1 day	FREE
BPEC ASHP course	This course covers the principles of design, installation, commissioning, and servicing of air source heat pump systems including water regulations. You'll get hands-on sessions and have a formal assessment leading to a nationally recognised BPEC qualification.	Installers who want to learn the skills and knowledge to correctly install heat pumps.	3 days*	£500.00 including water regulations
Baxi Heat Pump Installer course	This course provides in-depth knowledge and practical skills on our latest products covering design, application, installation and commissioning, as well as service and maintenance tips of the Baxi ASHP range. To complete this course installers will require a supervised commissioning visit on their first installation.	Installers who are registered MCS or have a recognised heat pump qualification.	3 days	£375.00

Visit **baxi.co.uk/training** to book your training

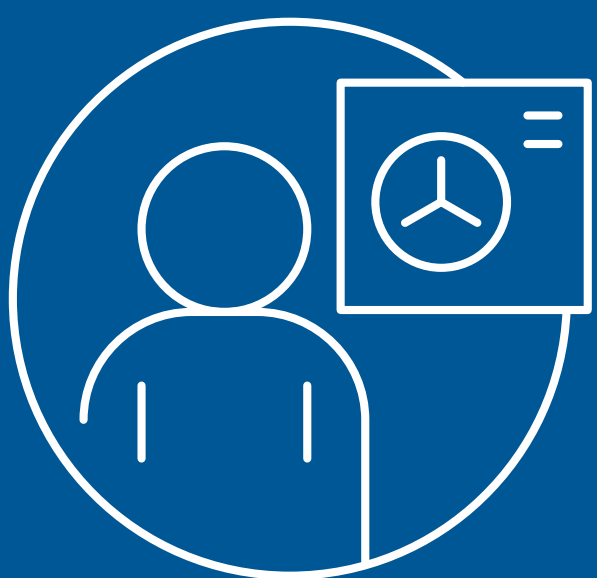

*4 days if water regulations required
